

## STAR LAKE TOWNSHIP E - BULLETIN # 20

**SUBJECT: 300<sup>th</sup> AVE. ½ Mile South of Hwy 24**

**DATE: 5/8/18**

This is to advise that 300<sup>th</sup> Ave. ½ mile south of County Hwy 24 is NOW OPEN to public traffic. The roadway that has been closed for the last six weeks has been repaired. Otter Tail County Emergency Services have been notified accordingly.

SLT Board appreciates the patience and cooperation of area residents that have been inconvenienced by this closure. We also want to thank the MN DNR and OTC Land & Resources for their cooperation and assistance in this matter.

This was a somewhat complicated repair due to deep frost and the proximity of a fiber optic cable. The permanent repair consequently could not be made until the frost was out. With DNR approval to lower the elevation of the culvert, we were able to salvage and reuse the existing culvert at a significant cost savings.

This section of roadway remains problematic with very limited shoulders and extreme care should be taken if meeting on-coming traffic.

Thank You.

Star Lake Township Board
